

Social Contribution Activities

The ROHM Group's mission is to maintain “constant dialogue and cooperation with local communities and residents.” We actively participate in a variety of local programs in all our locations.

Local river beautification activities

ROHM is a member of the local “Corporate Council for the Beautification of the Omuro and Tenjin Rivers,” which actively promotes the beautification of both rivers that run near the ROHM Head Office. ROHM makes significant contributions to the clean-up activities for the Omuro and Tenjin Rivers and remains committed to raising the environmental consciousness among participating companies.

Participation in local forestation activities

At REPI (ROHM ELECTRONICS PHILIPPINES, INC.), we are participating in forestation activities in the industrial complex where our factory is located, building a cooperative relationship with the local residents.

Forestation work within a Philippine industrial complex.

Local highway clean-up activities

Habitual environmental activities were evaluated in 2005 and it was decided that the periodic cleaning of public roads near our plant in Korea would be instituted. We were recognized by these activities and presented with the Korean Environment Preservation Award.

Clean-up activities on Korea's public roads.

Environmental education for local elementary schools

At ROHM headquarters, we implemented an environmental education program (including information about the prevention of global warming and recycling trash) for elementary school students based on the request of the local residents.

Weed removal activities for local municipal roads

At ROHM Fukuoka, employees have signed up to clear weeds from the local municipal roads and have volunteered to carry out these weed removal activities on a regular basis.

Volunteer cleanup activities at local festivals

Many ROHM Amagi employees volunteer to participate in trash collection at the annual Amagi City Festival, building a trusting relationship with the local residents.
